

Good Neighbor Watch

Making rural life safer is a goal your cooperative shares with you. That's why our employees are trained to spot suspicious activities as they make their daily rounds.

The cooperative has field employees in radio dispatched vehicles. Their alert reactions to any suspicious persons or vehicles can help reduce crime and vandalism in your area.

That's why Caddo Electric Cooperative offers you a "Good Neighbor Watch".

Cooperative employees will radio the co-op dispatcher when they run across any unusual situations such as car trouble, fires or livestock on the road. The dispatcher is given all the appropriate information.

The Cooperative has already been involved in organizing this program with law enforcement agencies, ambulance services and community officials. With this vital link, quick response time is assured during life-and-death situations.

Isn't it a nice feeling knowing someone is looking out for you?

The "Good Neighbor Watch" ... another "Good Neighbor" service offered by Caddo Electric Cooperative.
